Professional Summary

Backend Java Developer with 2+ years of experience designing scalable, production-grade REST APIs and secure backend systems using Java, Spring Boot, PostgreSQL, and AWS. Proficient in OAuth2/JWT, multithreading, concurrency, CI/CD automation, and database query optimization. Experienced in leveraging AI-assisted development tools such as ChatGPT, Cursor, and Claude to accelerate development, optimize code, troubleshoot backend issues, and improve developer productivity.

Core Skills

- **Languages:** Java, SQL, Python
- **Frameworks:** Spring Boot, Spring MVC, Hibernate, JPA
- **Backend:** REST APIs, Multithreading, API Integrations, Concurrency
- **Database:** PostgreSQL, Query Optimization, Indexing
- **AI-Assisted Development:** ChatGPT, Cursor, Claude, Codex
- **Cloud & Tools:** AWS (SQS, S3), Nginx, Git, Maven, Jenkins, IntelliJ IDEA, Postman
- **Security:** Spring Security, OAuth2, JWT, RBAC
- **API Documentation:** Swagger/OpenAPI

Professional Experience

Software Engineer

June 2024 – Present

Simplogics Solutions, Technopark, Thiruvananthapuram, Kerala

- Designed and developed scalable, production-grade RESTful APIs using Java 21 and Spring Boot for enterprise and healthcare platforms.
- Implemented secure authentication using Google OAuth2, JWT and Spring Security with RBAC enforcement.
- Designed asynchronous event-driven workflows using AWS SQS and Amazon S3 to improve scalability and background job reliability.
- Optimized PostgreSQL queries and indexing strategies, reducing API response times by over 30% for high-volume backend operations.
- Designed dynamic search APIs with Spring Data JPA Specifications supporting pagination and sorting for 100k+ records.
- Improved bulk data processing throughput by 25% through multithreading and concurrency optimization.
- Integrated third-party services including eBay (SOAP/WSDL), Shopee, Digio eKYC, and WhatsApp Business API.
- Automated build, testing, and deployment workflows using Jenkins-based CI/CD pipelines, improving release consistency and deployment efficiency.
- Developed backend services to process FHIR healthcare data for AI-powered patient summaries.
- Leveraged AI-assisted development tools including ChatGPT, Cursor, and Claude to accelerate backend development, optimize SQL queries, troubleshoot Spring Boot applications, and streamline development workflows while ensuring production-quality code through manual review and testing.

Technical Projects

Cricket Video Summarization Platform

Java, Spring Boot, Python

- Developed JWT-secured REST APIs for an automated cricket video summarization platform, reducing processing latency by 30% through backend optimization.

Event Photo Management Platform

Java, Spring Boot, Python

- Engineered REST APIs integrating a Python face-recognition microservice for AI-powered event photo storage and selfie-based photo search.

Certifications

Oracle Certified Professional (OCP) – Java SE 11 Developer (2025)

Education

Toc H Institute Of Science & Technology, Kochi, Kerala

Aug 2020 – May 2024

B.Tech in Computer Science Engineering – CGPA: 9.52

Extracurricular Activities

- Cricket — Represented Simplogics Solutions in the Technopark Premier League as Team Captain.
